

ROBERT SMITH

Columbus, NC | 828-301-8881 | robertets88@gmail.com

<https://www.linkedin.com/in/robertevanteaguesmith/>

EDUCATION

BS Computer Science / **University of Florida** | Gainesville, FL- May 2025

BA Psychology / **Appalachian State University** | Boone, NC- May 2012

SKILLS

Python (Pandas, PySpark, Numpy, Ssqlalchemy), SQL, AWS, EC2, Lamda, S3, Redshift, ETL, Docker, Airflow, Oracle DB, PostgreSQL, Data Modeling, Warehousing, Node.js

EXPERIENCE

Obtained B.S. in Computer Science

University of Florida | Remote

Sept 2023 – May 2025

- Built a quantitative financial model that can aid financial analysts in valuing publicly traded companies with linear regression, random forest, support vector machine, lstm neural network

Data Engineer

Socure | Remote | laid off due to RIF

Jun 2022 – Jan

2023

- Rebased Python codebase to streamline ingestion of fraud feedback labels into AWS Redshift data warehouse reducing editing of YAML files many manual hours a week
- Optimized data ingestion using Great Expectations (GX OSS), scaling from 20M records per year to 250M in six months by eliminating bottlenecks caused by nontechnical stakeholders and inconsistent data
- AWS S3 triggered Lambda function to start EC2 instance that hosted Airflow DAG, ultimately ingested into Snowflake
- Developed ETL pipeline with Airflow and Python to delete expired data based on data governance policies to reduce multiple days a month of employee work
- Constructed a multistage CI/CD pipeline in Gitlab (.gitlab-ci.yml)
- Crafted Looker Dashboard (Google Data Studio) to report metrics on label ingestion for business intelligence needs
- Reduced query response times by 40% through indexed views, enhancing dashboard performance,
- Regularly completed ad hoc analysis of data with SQL or Pandas for various teams

Full Stack Developer

Riverside/NOAA/NCEI | Remote

Feb 2020 – Sep 2021

- Engineered custom CRUD application with React, Node.js, Javascript to consume REST API
- Created RESTful API in Python that utilized SQLAlchemy to serve images from Oracle Database
- Designed a normalized database schema of image data along with metadata for quicker searches
- Wrote SQL queries to clean and organize database
- Gave weekly presentations to stakeholders and created stories based on feedback
- Promoted to Scrum Master for DAOPs team and implemented agile methodologies
- Created a central repository for documentation of all applications at NCEI
